RE: ELATA RECOMMENDATION LETTER

We herewith confirm having worked with Elata for our survey, planning and design works on our FTTH Network rollouts in the Cities of Chandler, Phoenix and Avondale, Arizona.

Elata was contracted to:

1. Conduct site/area surveys.
2. Identify existing utilities in the PUE and Rights of Way.
3. Log 811 design tickets.
4. Follow up and source existing utility services maps.
5. Capture and map out all existing services.
6. Design our FTTH Networks.
7. Produce City Permit drawings.
8. Produce Construction drawings.
9. Produce Fiber Splicing diagrams.
10. Verify and sign off any engineering requirements.
11. Capture all as-built data and produce as-built designs.

Elata's design work is of outstanding quality. Our Permit Drawings could not have been done on time without the hard work and dedication of Elata's designers and their willingness to go the extra mile.

Elata's understanding of City requirements, especially in the greater Phoenix region, shows that they can succeed in any US State or City.

We are very happy to have partnered with them and can unreservedly recommend their services.

Yours Sincerely

Dieter Kusel
